DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: the invention as disclosed in paragraph 00019 of the specification (semiconductor carrier with one flexible appendage). Claims 1-25 and 36-62 appear to read on this species.

Species II: the invention as disclosed in paragraph 00021 of the specification (semiconductor carrier with two flexible appendages). Claims 26-30 and 63-66 appear to read on this species.

Species III: the invention as disclosed in paragraph 00022 of the specification (semiconductor carrier with three flexible appendages). Claims 31-32 appear to read on this species.

Species IV: the invention as disclosed in paragraph 00023 of the specification (semiconductor carrier with four flexible appendages). Claims 33-35 appear to read on this species.

Should Applicant elect Species I, Applicant is further required to elect *one* subspecies from *each* of the following groups:

Group 1—device on body portion

1A: semiconductor device bonded to the body portion (claims 3 and 39 appear to read on this subspecies).

1B: no semiconductor device bonded to the body portion (claims 4 and 40 appear to read on this subspecies).

Group 2—composition of carrier

2A: flexible circuit (claims 22 and 58 appear to read on this subspecies).

2B: polyimide (claims 23 and 59 appear to read on this subspecies).

2C: anisotropic conductive film (claims 24 and 60 appear to read on this subspecies).

Group 3—composition of body portion (relating to claims 21 and 57)

3A: ceramic

3B: fiberglass based board

3C: plastic

3D: polyimide

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 37 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
